RECEPTION DESKS

SERVICE RECEPTION DESK

RECOMMENDATION

We recommend reception desks in island position in order to improve the traffic on each side.

When there are several reception desks, the circular ends are positioned in the same direction.

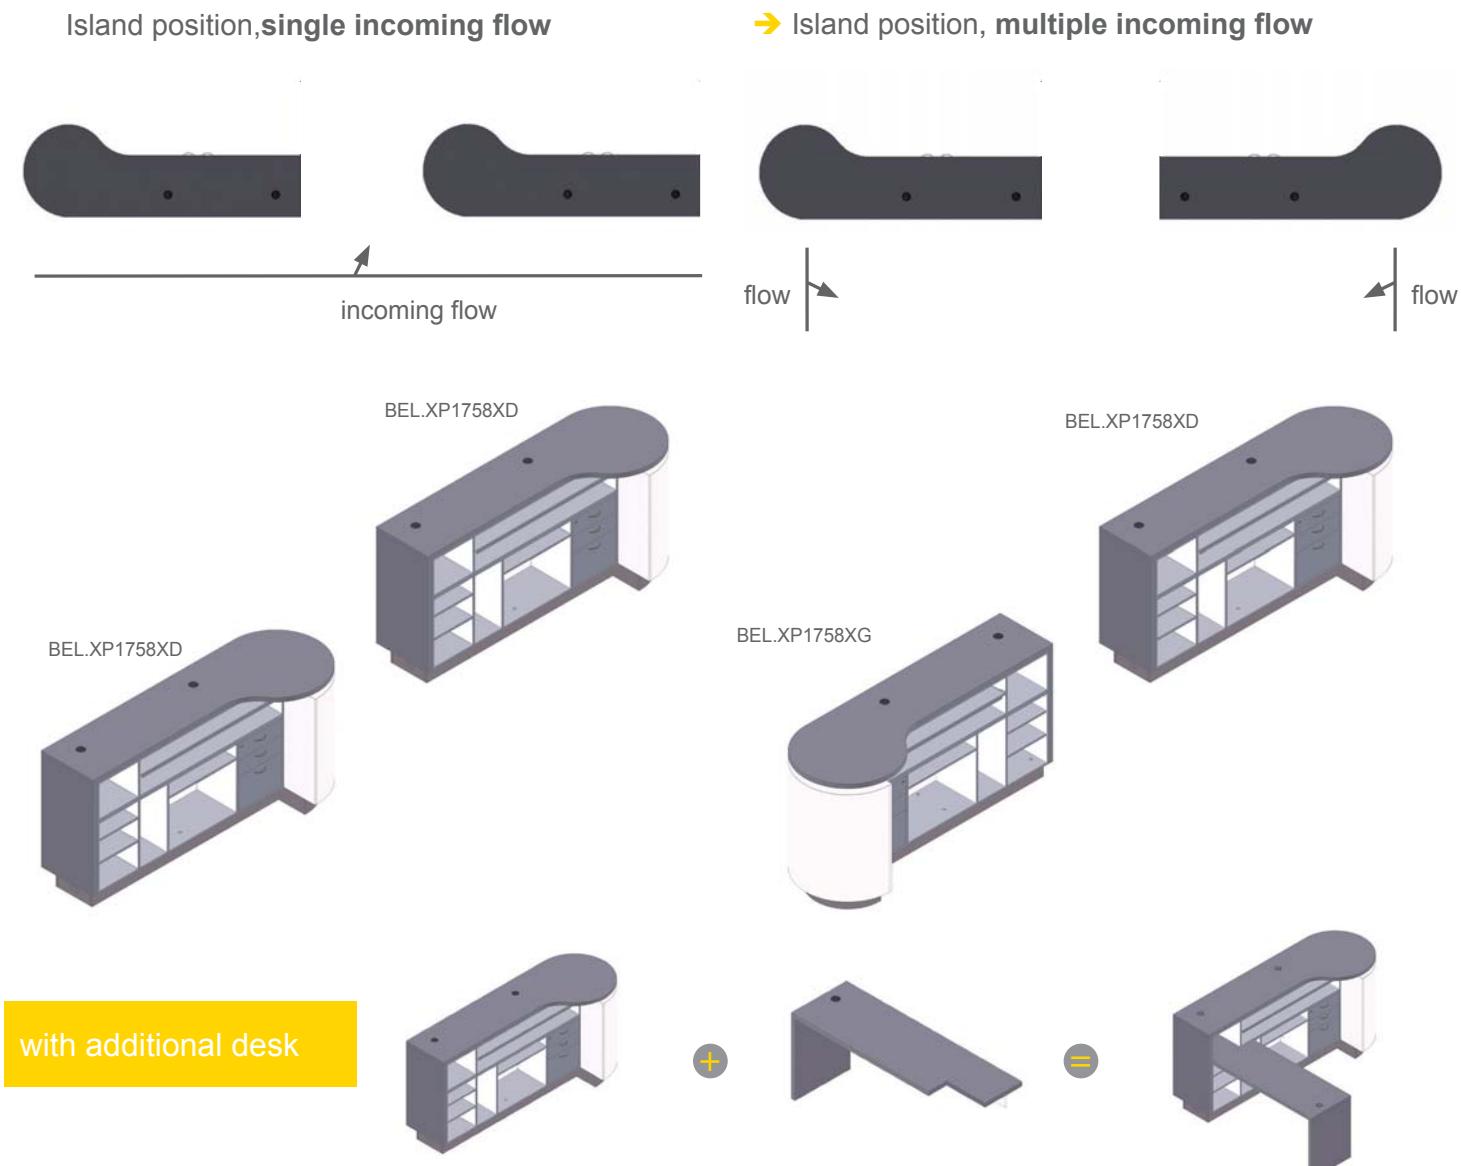

If there are multiple incoming flows, it will be possible to position the circular ends in opposite direction.

(From 3 reception desks onwards, the position of the circular ends in the same direction is compulsory).

LAYOUT

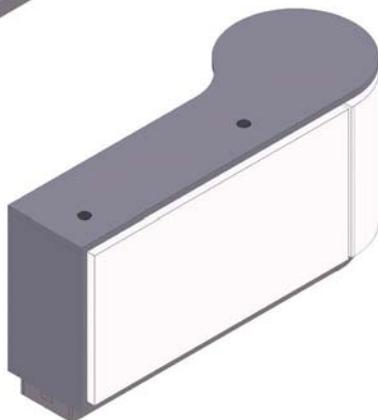

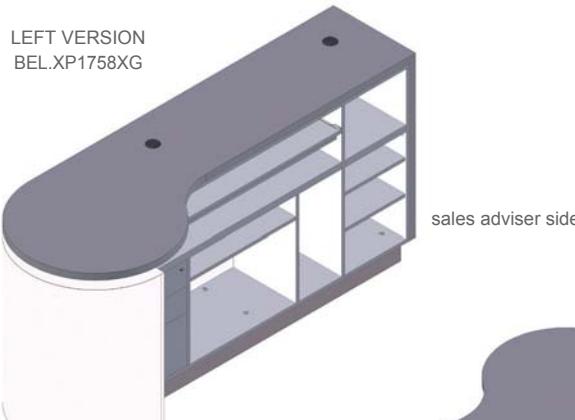

Set up as Front Office, the reception desks are positioned according to the incoming flow. In case of space constraints, the reception desks can be used in standing or seated position (including an additional work desk).

→ Examples :

PARTS & ACCESSORIES SERVICE

RECEPTION DESK

@ MCI H

Set up as Front Office, the reception desks of the Parts & Accessories Service are designed for a quick and professional handling of the customer. The modular design offers the possibility to realize different layouts.

In case several units are joined, you can order the unit without both sides or just with 1 left or 1 right side.

RECOMMENDATION

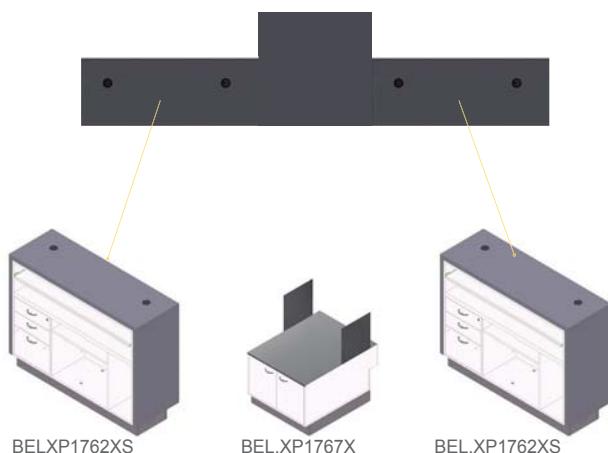

We recommend a minimum of 2 receptions desks for a separate handling of the private- and professional customer as well as a low "pass-package" unit.

The number of additional reception desks depends of the volume of your customer flow.

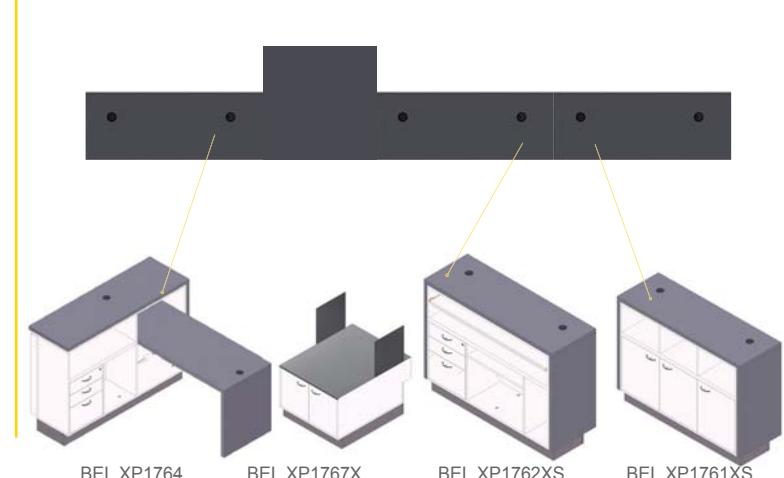

→ Examples

- 2 reception desks et 1 pass-package unit

- 3 reception desks et 1 pass-package unit

HOW TO FORMALIZE YOUR PROJECT

- ① Identify the circulation flow of your customers and the goods
- ② Take the exact measurements of the dedicated location
- ③ Identify the number of computers needed, the computer peripherals to be installed and all the other specific needs.
- ④ Identify the energy inlets (on the floor or in the ceiling)) : 220 volts, cable, network etc.
- ⑤ Plan an access for Persons with Reduced Mobility.

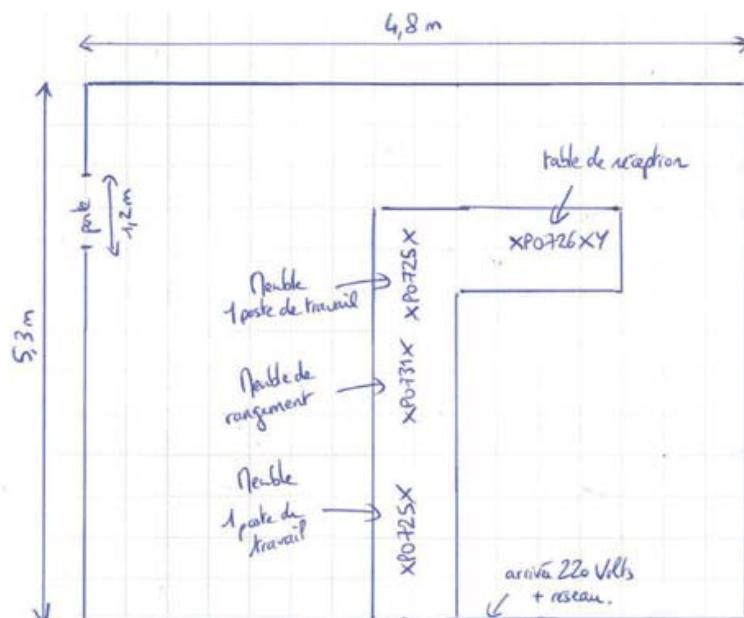

PRACTICAL APPLICATION

You can provide us with a site plan of your customer reception zone with the following minimum information:

- The circulation flow of your customers (entrance/exit) and the positioning of the doors.
- The total surface of your customer reception zone.
- The positioning of the electrical outlets.
- The selected furniture (references).

And all further information that may be helpful in order to give you the best possible advice.
